Feature

FreeSync Premium delivers ultra-smooth tear-free gaming

Screen tearing and stuttering doesn't only harm gaming performance, it also destroys immersion. AMD FreeSync Premium addresses this by keeping your monitor's refresh rate synced with your processor's. This technology works best on 120Hz and above refresh rates on higher resolution screens, while also supporting low framerate compensation features.

FreeSync Premium OFF

FreeSync Premium ON

Curved Screen

Curved screens offer a more immersive user experience that puts you at the center of the action. By mimicking the curvature of the eye, it is also less straining to track movement around the screen. The screen's deeper-than-average curvature provides a more engaging experience and allow you to enjoy beautiful visuals from almost any angle.

85% NTSC Wide Color Gamut

AOC Super Color technology enlivens the viewing experience with more passionate reds, enchanting greens and soothing blues. With this hardware solution, you can enjoy better color accuracy and true-to-life color reproduction in your photos, videos and more.

144Hz Refresh Rate and 1ms Response Time

With a 144Hz refresh rate and 1ms response time, your display will be equipped to perform at the pro gaming standard. Enjoy an ultra-smooth experience with no visible screen blur to ensure you're always prepped to win.

144Hz

60Hz

Shadow Control

AOC Shadow Control enables fast contrast adjustment of the in-game image. It improves areas of the screen that are too dark or washed out without affecting the rest of the screen.

Shadow Control Default 50

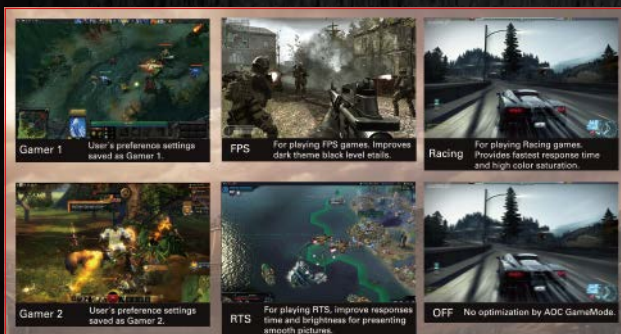

Shadow Control adjust to 80

- If picture is too dark to see the details clearly, adjust the level up to have a better view of the dark area.
- If picture is too bright and wash out, adjust the level down to provide dark definition.

Game Mode

It can be a hassle to adjust monitor settings every time you load up a new game. AOC Game Mode allows quick adjustment and pre-designed setups (tailored for different genres) to enhance the gaming experience.

Game Color

With AOC Game Color, you can adjust color saturation and grey levels across 20 levels of detail for a better game experience. Delight in more vivid MMORPG scenes, more intense FPS action, and better MOBA character details.

Flicker Free

Flicker Free technology uses a smooth backlight system to prevent monitor flickering. This reduces eye strain and other damaging effects to your eyes – an especially valuable feature when working overtime, gaming for long hours or watching movies.

Low Blue Mode

Long exposure to short wavelength blue light may cause eye strain, sleep disorders, or headaches. AOC Low Blue Mode puts the user first by reducing the screen's short wavelength blue light emission without sacrificing color accuracy. Also provides four different filtering modes – reading, web browsing, multimedia, and office.

Scene Light

Scene Light provides a more immersive gaming experience by emitting ambient light during gameplay. Hardcore gamers can also customize the technology to flash their team color at e-sport events.

Specifications

Model Name	AG322FCX1
Panel Size	31.5"
Pixel Pitch (mm)	0.36375 (H) x 0.36375 (V)
Effective Viewing Area (mm)	698.4 (H) x 392.85 (V) (mm)
Brightness (typical)	250 cd/m ²
Contrast Ratio	3000 : 1 (Typical) 80 Million : 1 (DCR)
Smart Response	1ms (MPRT)
Viewing Angle	178° (H) / 178° (V) (CR > 10)
Color Gamut	NTSC 85%
Optimum Resolution	1920 x 1080 @ 60Hz – VGA 1920 x 1080 @ 144Hz – HDMI 1.4, DisplayPort 2.0
Display Colors	16.7 Million
Signal Input	VGA x 1, HDMI 1.4 x 2, DisplayPort 1.2 x 1
Power Supply	20V DC, 3.25A
Smart Power Mode: Typical	35W
Built-in Speakers	no
Regulatory Approvals	BSMI / KC / KCC / e-Standby RCM / MEPS / CE / VCCI / J-Moss
Wall-Mount	100mm x 100mm
Cabinet Color	Black & Silver
Adjustable Stand	Tilt: 5.5° ~ 23.5°
Product with Stand (mm)	527 (H) x 712.7 (W) x 242.9 (D)
Packaging (mm)	570 (H) x 818 (W) x 272 (D)
Weight (Net/Gross) kg	7.7 / 10.9
