## Featuring

### **FHD display / 1080p display**

Be prepared for brilliant visuals and crisp images with the unforgettable quality of this stunning FHD display.<sup>1</sup>

### **1-millisecond response time with Overdrive**

How fast your pixels can react to changing frames is critical for fast-paced gaming, and a 1-millisecond response time ensures even the most action-packed moments are fluid, crisp, and free of motion blur.<sup>2</sup>

### **Adjust your view**

Adjust the screen to your personal preference with a 5-degree forward or 20-degree backward tilt.

### **Low blue light**

Using the Low Blue Light mode subtly shifts your display's colors to a warmer spectrum, while making whites more natural and putting less strain on your eyes.

### **TN panel**

## Messaging Footnotes

<sup>1</sup> AMD FreeSync™ is only available when it is connected on DisplayPort™ or HDMI. FreeSync is an AMD® technology enabled on FHD or QHD monitors and is designed to eliminate stuttering and/or tearing in games and videos by locking a monitor's refresh rate to the frame rate of the graphics card. AMD Radeon Graphics and/or AMD A-Series APU-compliant monitors with DisplayPort™/HDMI Adaptive-Sync required. AMD 15.11 Crimson driver (or newer) required to support FreeSync over HDMI. Adaptive refresh rates vary by monitor. More information is available at [www.amd.com/freesync](http://www.amd.com/freesync).
