

Wider and vibrant view at home.

Sleek, stylish, and purposeful in equal measure.

The Lenovo C22e-20 Monitor is equipped with all the display features you need at home for working, studying, or entertainment. The compact, 21.45-inch VA panel display with FHD resolution delivers crisp images even from wide viewing angles. Around the display, 3-side NearEdgeless bezels add to its modern look, making for a seemingly borderless viewing experience. Preloaded with AMD FreeSync™ technology¹, users can enjoy distortion-free gaming without screen tearing and smooth, high-resolution content. Even working extra hours is comfortable thanks to TÜV Rheinland Low Blue Light and Flicker Free technology that help reduce eye fatigue. The C22e-20 Monitor offers supreme connectivity to peripherals or gaming consoles using the HDMI or VGA ports. For improved flexibility to match any requirement, users can place the monitor on the desk or mount it on a wall using the VESA mount as the work demands.

Features of Lenovo C22e-20 Monitor

Modern display, compact build

The compact, user-centric design of 3-side NearEdgeless bezels maximizes screen real estate while minimizing the form factor, resulting in a stylish monitor that blends into any home decor. Its FHD VA panel produces sharp images from wide viewing angles as well as an impressive 3000:1 contrast ratio for lifelike colors. At 21.45-inches, the display size hits the sweet spot—large enough for an enhanced and detailed view, as well as a compact size to fit into any environment. The C22e-20 Monitor lets users stay productive while working or studying and enjoy vivid entertainment.

Seamless viewing experience

Work-from-home staffers and students alike will enjoy working, gaming, or consuming content on the C22e-20 Monitor. Equipped with AMD FreeSync™ technology¹ that synchronizes the monitor's refresh rate with the graphics card, users can enjoy reduced screen tearing and stuttering for smooth video output. A 4ms response time and 75Hz² refresh rate are more than sufficient for casual gamers, enabling engaging gameplay. When used for extended hours, TÜV Rheinland Low Blue Light and Flicker Free technology help reduce eye fatigue by reducing harmful high-energy blue light and screen flicker.

Amplified connectivity

The C22e-20 Monitor provides all the connectivity port options that users require. Multiple video input ports, HDMI, or VGA, allow for a variety of connections. Users can easily plug in their laptops, PCs, set-top boxes, gaming consoles, or other devices. Additionally, the audio out port ensures enhanced, distraction-free audio experiences via headphones or speakers while working or learning. Desk-mount it on its tiltable stand for flexible deployment and comfortable viewing in any environment or wall-mount it using the 100 mm x 100 mm VESA connectors.

¹ AMD FreeSync™ technology only can work with AMD Radeon™ series graphics card. | ² For HDMI only.
